

To our Valued Patients:

**We are excited to announce that we are now offering telemedicine.**

Telemedicine is the use of technology in order to provide real-time virtual appointments allowing patients and providers a convenient alternative to face-to-face appointments. With online sessions, patients can meet with their skin care specialists from the comfort and safety of their own home.

In order to have a telemedicine appointment, you must have a smart phone or a computer/tablet with a camera and microphone for video capability. **To schedule a telemedicine appointment from any location, call our office at 1-877-231-3376.** You will receive detailed instructions by text and will be directed to complete paperwork and consent forms online.

Your telemedicine appointment will be scheduled with one of our board-certified dermatologists, a dermatology-trained nurse practitioner or physician assistant. In many cases, you will be able to receive care from your regular dermatology provider, ensuring comfort and confidence.

Telemedicine appointments are HIPPA-compliant and can be billed to insurance in most cases. We also offer the service to self-pay patients for only \$49 per session. At this time, telemedicine appointments are available to existing patients for the following visits:

- Spot/Lesion Checks
- Rashes
- Acne
- Rosacea
- Psoriasis
- Medication Refills
- And More...

We believe in-person treatment is the highest quality care; however, we are offering telehealth appointments in this current environment. Providers and patients alike are concerned about the spread of COVID-19, so we are happy to provide this option to protect everyone's health.

We appreciate the trust you have placed in us for your dermatologic needs and promise to provide you with the same premium care during telemedicine visits. We look forward to working together to ensure that those who need care receive it in the safest environment possible.

We hope that each of you stay safe & healthy.
