MICRONEEDLING POST-CARE

- If any Microneedling Delivery Solution roll-on remains, have the patient apply continually until gone.
- Micro-channels in the skin will remain open for an hour or less following treatment, so this serum will continue to penetrate the skin to enhance results.
- No other products should be applied until tomorrow.
- When the numbing wears off the skin may feel like a mild sunburn. The patient may apply a cool compress as desired.
- Needle lengths of 0.25mm, 0.5mm will result in mild redness and swelling for up to 24 hours. Needle lengths of 1mm, to 1.5mm will result in redness and swelling for up to 72 hours.
- Beginning tomorrow apply the ProCell Cellular Renewal Serum and Healing Accelerator to enhance results. (Cleanse and apply 1 pump, or a pea-sized amount. Apply daily, morning and evening.
- We recommend a follow up Microneedling treatment in four to six weeks.
